100% remote, Full-time

Inside is on a mission to make people smarter! We curate the latest news and innovations in business, tech, and venture capital through newsletters, events, and the Inside.com community. Founded by Jason Calacanis, Inside is a fully remote team of entrepreneurs, innovators, and doers. Join us!

We are seeking an experienced AI Developer specializing in natural language processing (NLP) to join our team and help us integrate AI into our email newsletter curation service. The ideal candidate will be responsible for developing and maintaining AI-driven solutions, such as chatbots and virtual assistants, using state-of-the-art language models like ChatGPT. You will work closely with data scientists and other developers to integrate AI technologies into our existing products and services, focusing on automated content creation and personalized recommendations.

What You'll Do:

- Develop and maintain AI-driven solutions, including chatbots and virtual assistants, using NLP techniques and state-of-the-art language models like ChatGPT.

- Collaborate with data scientists to incorporate AI technologies into our newsletter curation service for content automation and personalization.
- Work with other developers to ensure seamless integration of AI technologies across multiple platforms.
- Stay informed on the latest advancements in NLP, machine learning, and AI research to enhance the team's knowledge base and inform development efforts.
- Participate in testing and evaluating AI technologies, assessing their impact on our newsletter curation service.
- Identify and troubleshoot issues related to AI technology implementation, including language model integration.

What We're Looking For:

- Bachelor's degree in Computer Science or related field.
- Strong understanding of natural language processing (NLP) techniques and machine learning algorithms.
- Experience with ChatGPT and other cutting-edge language models.
- Proficiency in programming languages such as Python, Java, or C++
- Experience with TypeScript | React+Next | React Native
- Experience with Ruby on Rails | AWS
- Excellent problem-solving skills and the ability to work both independently and collaboratively.
- Strong communication skills, with the ability to convey technical concepts to non-technical stakeholders.
- Experience with Agile software development methodologies is a plus.

The details you'll want to know

- 100% remote work
- Full-time position
- Compensation: \$125,000 per year with benefits
