MOSTLY·AI

[Remote] Developer in Test

EUROPE - REMOTE / ENGINEERING / FULL-TIME / REMOTE

Welcome to the Future

Become a part of the revolution at MOSTLY AI, where cutting-edge technology meets privacy protection. We lead the way in privacy-preserving synthetic data, using advanced Generative AI to create it. Our goal is clear: to provide everyone with secure data, enabling them to build a brighter and more equitable future.

At MOSTLY AI, we assist companies worldwide in sharing their large data sets with peace of mind, ensuring the privacy of their clients always comes first. With an expanding clientele, we are searching for a **Developer in Test** to join our dynamic team and make a meaningful contribution to the world of AI.

Take advantage of this opportunity to have a lasting impact through AI. Join us!

Join the Revolution

You are relentless regarding software quality. You deeply care about reaching near-perfection in a continuous development cycle. You take pride in making sure software ships "top quality". You have the drive to build up a complete testing process for a deep-tech start-up. You are happy to interact directly with clients to support solving their problems.

If this sounds like you, then you should read further!

Ride the AI wave

- Play a key role in the end-to-end quality assurance and testing of products, tasks and deliverables

- Collaborate with engineers and product managers to understand specifications and create test plans, test cases

- Collect and define requirements from product, development and infrastructure teams for the successful testing and release process

- Define, prepare and manage test data sets

- Develop highly customizable and reusable automated test cases on the test framework

- Maintain automated test case repositories for different versions of the product

- Carry out manual functional tests, when automated test cases cannot catch up

- Execute smoke tests, regression tests, end-to-end tests, schedule nightly tests

- Efficiently manage testing priorities

- Effectively identify and communicate defects discovered during testing

Bring your A-game

- 4+ years of Software QA experience using automation

- UI, API and CLI test automation experience with relevant frameworks like TestCafe, Cypress, Playwright, etc.

- Experienced level of Typescript/Javascript know-how

- Familiarity with CI/CD tools

- Understanding of software development best practices

- Backend testing experience

- Frontend testing experience

- Good knowledge of Linux OS, container architecture, cloud platforms, preferably Kubernetes

- Experience in working with relational databases

- Willingness to learn and constantly improve

- Strong analytical mindset, quality and efficiency obsession

- High sense of responsibility

- Highly energetic personality with a "can do/ getting things done" attitude

- Result-driven as well as excellent interpersonal, communication, and collaborative skills

- Must be able to navigate and blend into a high paced start-up environment.

Fuel your growth

- **Lunch subsidy** - Monthly lunch stipend valued at €100 per month

- **Boost your development:** continuous career development with an individual training budget and development check-ins twice a year

- **Time to recharge:** extra days off in addition to standard holidays and PTO

- **Giving back to the community:** one volunteering day per year

- **Heaps of fun:** Virtual team activities and twice a year in person

- Celebrations of your Birthday, Anniversary, and other special moments in YOUR life

- At MOSTLY AI we are striving for excellence and don't settle for average, that is why we offer competitive salary packages in addition to all our perks.

About MOSTLY AI

MOSTLY AI serves many of the most renowned brands with its synthetic data platform. In particular, industries that deal with highly sensitive data already today reap the value of synthetic data. At the same time, there is a growing appetite for safe & smart data across all industries. These innovation leaders help us move forward, and define the category for years to come. Synthetic data will become a key pillar of every organization's data stack.

To us, it is key that as many people as possible can access, collaborate and build upon granular-level data, without infringing on anyone's privacy. Data that is artificially generated, yet representative, realistic, and insightful for people as well as algorithms alike. This allows for broad data collaboration within and across organizations, helping these to leverage the immense power of Data & AI in order to put these to good use for the benefit of everyone.

Our team is a diverse group of individuals from various backgrounds and walks of life, and we welcome all applicants. We are committed to providing equal employment opportunities to all. Regardless of a person's race, ethnicity, color, creed, religion, sex, sexual orientation, gender identity, marital status, citizenship status, age, national origin, ancestry, disability, veteran status, or any other legally protected status and to affirmatively seek to advance the principles of equal employment opportunity.

If you're ready to join the revolution and make a real impact through AI, we want to hear from you!
